

Rohit Kalyan Kandulapati

DevOps Engineer

Hyderabad, India | rohitkalyank@outlook.com | 09381690529 | LinkedIn | GitHub | rohitkalyan.in

Summary

CKA-certified DevOps Engineer with 3 years building and operating cloud-native infrastructure on AWS for enterprise-scale platforms. Hands-on with Amazon EKS, GitOps CI/CD, and infrastructure automation across production workloads serving 13+ applications. 3× Elevance Health Impact Award recipient for platform reliability and automation excellence. Delivered 85% reduction in maintenance downtime and 40% compute resource optimization through containerization of enterprise workloads.

Experience

Carelon Global Solutions (Elevance Health)

July 2023 – Present

Software Engineer – DevOps & Platform Engineering

Hyderabad, India

- Reduced planned maintenance downtime by **85%** by implementing a Blue-Green deployment strategy on Amazon EKS with Route 53 weighted routing, enabling instant rollback and zero-downtime production releases.
- Cut compute resource utilization by **40%** and reduced deployment time from hours to minutes by leading end-to-end containerization and migration of a Pega Infinity application across 6 environments to Amazon EKS.
- Eliminated **~42 hours/week** of manual operational effort for a 13-member team by developing Jenkins pipeline automation and Ansible playbooks to orchestrate Tomcat server lifecycle operations across 40+ servers and 80+ instances.
- Led a Pega Infinity major version upgrade (v8.8 to v24.1) across 6 environments including production, coordinating with database and application teams to achieve **zero data loss**, 99.9% platform availability, and zero P1 incidents post-go-live.
- Delivered and maintained CI/CD pipelines (Jenkins + Argo CD GitOps) for AI-backed applications integrated with **AWS Bedrock**, containerizing FastAPI backend and React frontend services on Amazon EKS.
- Automated **SSL/TLS certificate lifecycle management** across 100+ servers and load balancers using Bash and Python scripts, reducing certificate-related production incidents to zero.
- Designed and executed **disaster recovery drills** for EKS production workloads, authored operational runbooks covering RTO/RPO targets, and maintained **100% failover success rate** across all production services.
- Operated infrastructure supporting **13+ enterprise applications** across 100+ Linux servers and 200+ Tomcat instances spanning Amazon EKS and on-premises environments.

Technical Skills

Cloud Platforms: AWS (EC2, EKS, ECR, S3, IAM, VPC, ALB, Route 53, RDS, Secrets Manager)

Containers & Orchestration: Kubernetes (EKS, OpenShift, ROSA), Docker, Podman, Helm

CI/CD & GitOps: Jenkins, Argo CD, GitHub Actions, Bitbucket, Git, Quay Container Registry

Infrastructure as Code & Config Management: Terraform, Ansible

Monitoring & Observability: Splunk, Datadog, AppDynamics, CloudWatch

Security & Access: Kubernetes RBAC, IRSA, IAM Policies, Network Policies, TLS/SSL Management

Scripting & OS: Bash/Shell Scripting, Python, Linux (RHEL)

Certifications & Awards

Certified Kubernetes Administrator (CKA)

Jan 2025 (Valid through Dec 2027)

3× Elevance Health Impact Award — Carelon Global Solutions

2024 · 2025

Awarded for contributions to platform reliability, infrastructure automation, and zero-downtime delivery of mission-critical platform upgrades.

Education

Bachelor of Technology – Electrical & Electronics Engineering

2023

Sagi Rama Krishnam Raju Engineering College, Bhimavaram, Andhra Pradesh
