Summary

CKA-certified DevOps Engineer with 3 years of experience architecting cloud-native infrastructure on AWS. Expert in Kubernetes orchestration, Infrastructure as Code (Terraform), CI/CD automation, and GitOps workflows. Delivered 85% reduction in maintenance downtime and 40% compute optimization through containerization and automation. Proven track record in site reliability engineering, disaster recovery, and zero-downtime production deployments.

Technical Skills

Cloud & Containers: AWS (Amazon EKS, EC2, ECR, S3, IAM, VPC, ALB, Route 53, RDS), Docker, Podman, Kubernetes, Helm, Docker Compose

IaC & Automation: Terraform, Ansible, Python, Bash, YAML

CI/CD & GitOps: Jenkins, GitHub Actions, Argo CD, Git, Bitbucket, Quay Container Registry

Monitoring & Observability: Splunk, Datadog, AppDynamics, CloudWatch, Prometheus, Grafana

Operating Systems & Security: Linux (Ubuntu, RHEL), IRSA, IAM Policies, TLS/SSL Management

Professional Experience

Carelon Global Solutions (Elevance Health)

July 2023 – Present

Software Engineer – DevOps & Platform Engineering

Hyderabad, India

- Migrated 20+ enterprise microservices from on-prem Tomcat instances to Amazon EKS using Helm and K8s manifests, reducing compute utilization 40% and deployment time from hours to minutes.
- Designed multi-AZ Blue-Green deployment strategy on Amazon EKS using Route 53 weighted routing, reducing planned maintenance downtime by 85% and enabling zero-downtime releases.
- Led end-to-end platform upgrade (v8.8 to v24.1) across 6 environments, coordinating database migrations to achieve zero data loss, 99.9% availability, and zero P1 incidents post-go-live.
- Built Jenkins CI/CD pipelines and Ansible playbooks to automate server lifecycles across 40+ servers and 80+ Tomcat instances, eliminating 42 hours per week of manual operations for a 13-member team.
- Engineered disaster recovery simulations and operational runbooks for EKS workloads with strict RTO/RPO targets, maintaining a 100% failover success rate across critical services.
- Maintained 99.9% uptime SLA for infrastructure supporting 13+ enterprise applications across 100+ Linux servers and 200+ instances spanning EKS and hybrid environments.

Certifications

Certified Kubernetes Administrator (CKA)

2025 – 2027

Awards

3x Elevance Health Impact Award – Carelon Global Solutions

2024 · 2025

Recognized for exceptional contributions to platform reliability, infrastructure automation excellence, and zero-downtime delivery of mission-critical platform upgrades.

Projects

QR Code Generator – Cloud-Native DevOps Platform

github.com/rohit-kandulapati/devops-qr-code

- Provisioned AWS infrastructure using Terraform (EKS, VPC, IAM), deployed microservices with Helm and Argo CD GitOps, automated CI/CD with GitHub Actions, and implemented IRSA for secure S3 access.

Kafka KRaft – Production-Ready Containerized Streaming Platform

github.com/rohit-kandulapati/kafka-kraft-alpine

- Engineered minimal Alpine-based Kafka container using ZooKeeper-free KRaft mode, deployed as 3-node StatefulSet on Kubernetes with persistent storage.

Education

Bachelor of Technology – Electrical and Electronics Engineering

2023

Sagi Rama Krishnam Raju Engineering College, Bhimavaram, Andhra Pradesh
